

JavaScript Developers (mid, senior, lead levels)

ZAGREB, CROATIA

EPAM is committed to providing our global team of 53,250+ people with **inspiring careers** from day one.

EPAMers think creatively and lead with passion and honesty. Our people are the source of our success. We value collaboration, work in partnership with our clients and strive for the highest standards of excellence. In today's market conditions, we're supporting operations for hundreds of clients around the world remotely. No matter where you are located, you'll join a dedicated, diverse community that will help you discover your fullest potential.

See Yourself in this Role at EPAM

We are looking for JavaScript Developers on mid-, senior and lead level who will develop and maintain high-quality, scalable JS code, collaborate with cross-functional teams to launch new features, optimize applications, mentor junior developers, and stay abreast of the latest industry trends while integrating third-party APIs. If you are looking to give your career a real boost with a global leader in digital transformation, EPAM is the perfect choice. If you'd like to learn more about this position and project, apply now.

What You Will Do

- Develop and maintain high-quality, scalable, and efficient JavaScript code
- Collaborate with cross-functional teams to define, design, and ship new features
- Optimize applications for maximum speed and scalability
- Troubleshoot and debug issues to ensure smooth user experiences
- Write clean, maintainable, and well-documented code
- Mentor junior developers and provide guidance on best practices
- Stay up-to-date with emerging trends and technologies in the JavaScript ecosystem
- Participate in code reviews and contribute to team knowledge sharing
- Integrate third-party APIs and services

What You Bring

- 3+ years of JavaScript/TypeScript development experience
- Solid experience with React, Angular or Node.JS
- Solid experience of writing unit tests
- Experience with Micro Frontend is a plus
- Experience with Cypress is a plus
- Good understanding of UI optimization techniques
- Good understanding of multi-tier web applications, experience working on all layers of the stack is a plus
- Good understanding of cloud environments such as AWS, Google Cloud or Azure is a plus
