

Senior/Lead DevOps Engineer with Cloud

ZAGREB, CROATIA

EPAM is committed to providing our global team of 53,250+ people with **inspiring careers** from day one.

EPAMers think creatively and lead with passion and honesty. Our people are the source of our success. We value collaboration, work in partnership with our clients and strive for the highest standards of excellence. In today's market conditions, we're supporting operations for hundreds of clients around the world remotely. No matter where you are located, you'll join a dedicated, diverse community that will help you discover your fullest potential.

See Yourself in this Role at EPAM

We are looking for a Senior/Lead DevOps Engineer with at least 5 years of Agile experience and a robust understanding of the Software Development Life Cycle, including Continuous Integration and Delivery. The ideal candidate should have deep expertise in Linux environments, hybrid cloud technologies such as AWS, Google Cloud, or Microsoft Azure. If you are looking to give your career a real boost with a global leader in digital transformation, EPAM is the perfect choice. If you'd like to learn more about this position and project, apply now.

What You Will Do

- Develop automation and processes to enable teams to develop, deploy, manage, configure CI/CD
- Actively participate in high level team activities such as suggesting architecture improvements, recommending process improvements and conducting tool evaluations
- Help solve business needs with technology by evaluating different technology options and products
- System troubleshooting and problem solving across applications
- Assist QA Automation engineers in technical testing

[Learn More](#)

What We Offer

- Diverse multicultural, multi-functional, and multilingual work environment
- Opportunities for personal and career growth in a progressive industry
- Global scope, international projects
- Widespread training and development opportunities, unlimited access to LinkedIn learning solutions included
- Competitive salary and various benefits

What You Bring

- Over 5 years of experience in Agile projects with a strong understanding of SDLC, Test Driven Development (TDD), and Continuous Integration/Continuous Deployment (CI/CD) practices.
- Proficient in Linux environments with expertise in its fundamentals and internals, as well as experience managing high availability, high-performance, multi-data center systems, and hybrid cloud environments.
- Hands-on experience with version control systems like Git, containerization technologies such as Docker, scripting in Bash/Shell/Python, and tools like Jenkins and Artifactory.
- Skilled in cloud platforms such as Microsoft Azure, AWS, or GCP, alongside expertise in Configuration Management tools such as Ansible, Chef, and Puppet.
- Knowledgeable in Infrastructure as Code using tools like Terraform, container orchestration with Kubernetes, and monitoring solutions like Grafana and Prometheus.
- Strong ability to troubleshoot complex issues, ranging from system resource limitations to application stack traces, and a solid understanding of internet security protocols such as PKI, LDAP, RBAC, SSL, HTTPS, TLS, DTLS, etc.
